## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wolff et al. (WO 91/12779).

Wolff discloses a stent with a coating of a polymer carrier and a pharmaceutically active substance (fig. 1 and pg. 10 lines 38). The concentration of the substance is predetermined in the longitudinal direction such that the implant exhibits predetermined locally different elution characteristics in the longitudinal direction (pg. 11 lines 9-26). (Examiner is considering weaving non-drug eluting strands with drug eluting strands to be a variance in concentration of the drug along the longitudinal direction of the stent). The polymer carrier can be biodegradable and the degradation behavior of the polymer changes local elution characteristics (pg. 12 lines 16-22).
